PERSONAL PROJECTS

Health Center Management System:

- Automating a complete health system for a medical center with various clinics, laboratories and a pharmacy, using screens that display patients' turn, and relying on barcode devices for patients' register and for the traffic of medications in and out of the pharmacy (a health system like the one used in Turkish hospitals).
 - For more details about this system with Arabic language, click this link: <https://goo.gl/GseZgA>, and there are some photos about this system here: <https://goo.gl/9fCAvw>

HR System:

- Automating HR department of an institution with several affiliated centers, with the possibility of adding certificates, photos, decisions and vacations to employees.
 - This system has (website & windows application), and there is a synchronization between them. To show some photos about this system click here: <https://goo.gl/LZWw2q>
 - This system can be used to receive and sort CVs, when jobs are advertised.

Health Statistic Website:

- Developing a website for collecting patient data from different health centers and visualization it graphically.
 - Some photos available here: <https://goo.gl/R3ZRSP>

Website for Orient Foundation:

- This site depended on WordPress technology, and has many pages, contact forms, galleries, ... etc.
 - Website address: <https://orientthr.ngo> (Two Languages).

Warehouses Management Website:

- Developing a website for managing multiple warehouses and recording all entry and exit movements, with the possibility of performing inventory check at anytime.
 - Some photos available here: <https://goo.gl/Um7QeE>

COURSES & CERTIFICATES

- ❖ Project Management for Development Course (PMD Pro1).
- ❖ Remote Project Management Course.
